Job Profile - Frontend Developer Intern

- As a front-end developer intern, I am responsible for crafting a visually appealing and user-friendly interface for our website.
- I have worked in translating design concepts or wireframes from Figma into interactive user experiences using React.
- I have followed the coding practices such that the web applications I develop are responsive and seamlessly adapted to different screen sizes and devices.
- Integration with the Backend framework and the database to ensure the complete flow of the feature added to the webpage.
- While working on frontend development debugging and version controlling were part of the daily routine.

Project Work

Feature Suggestions & Feedback

We are required to provide suggestions and take feedback so that we can enhance the overall user experience of the system
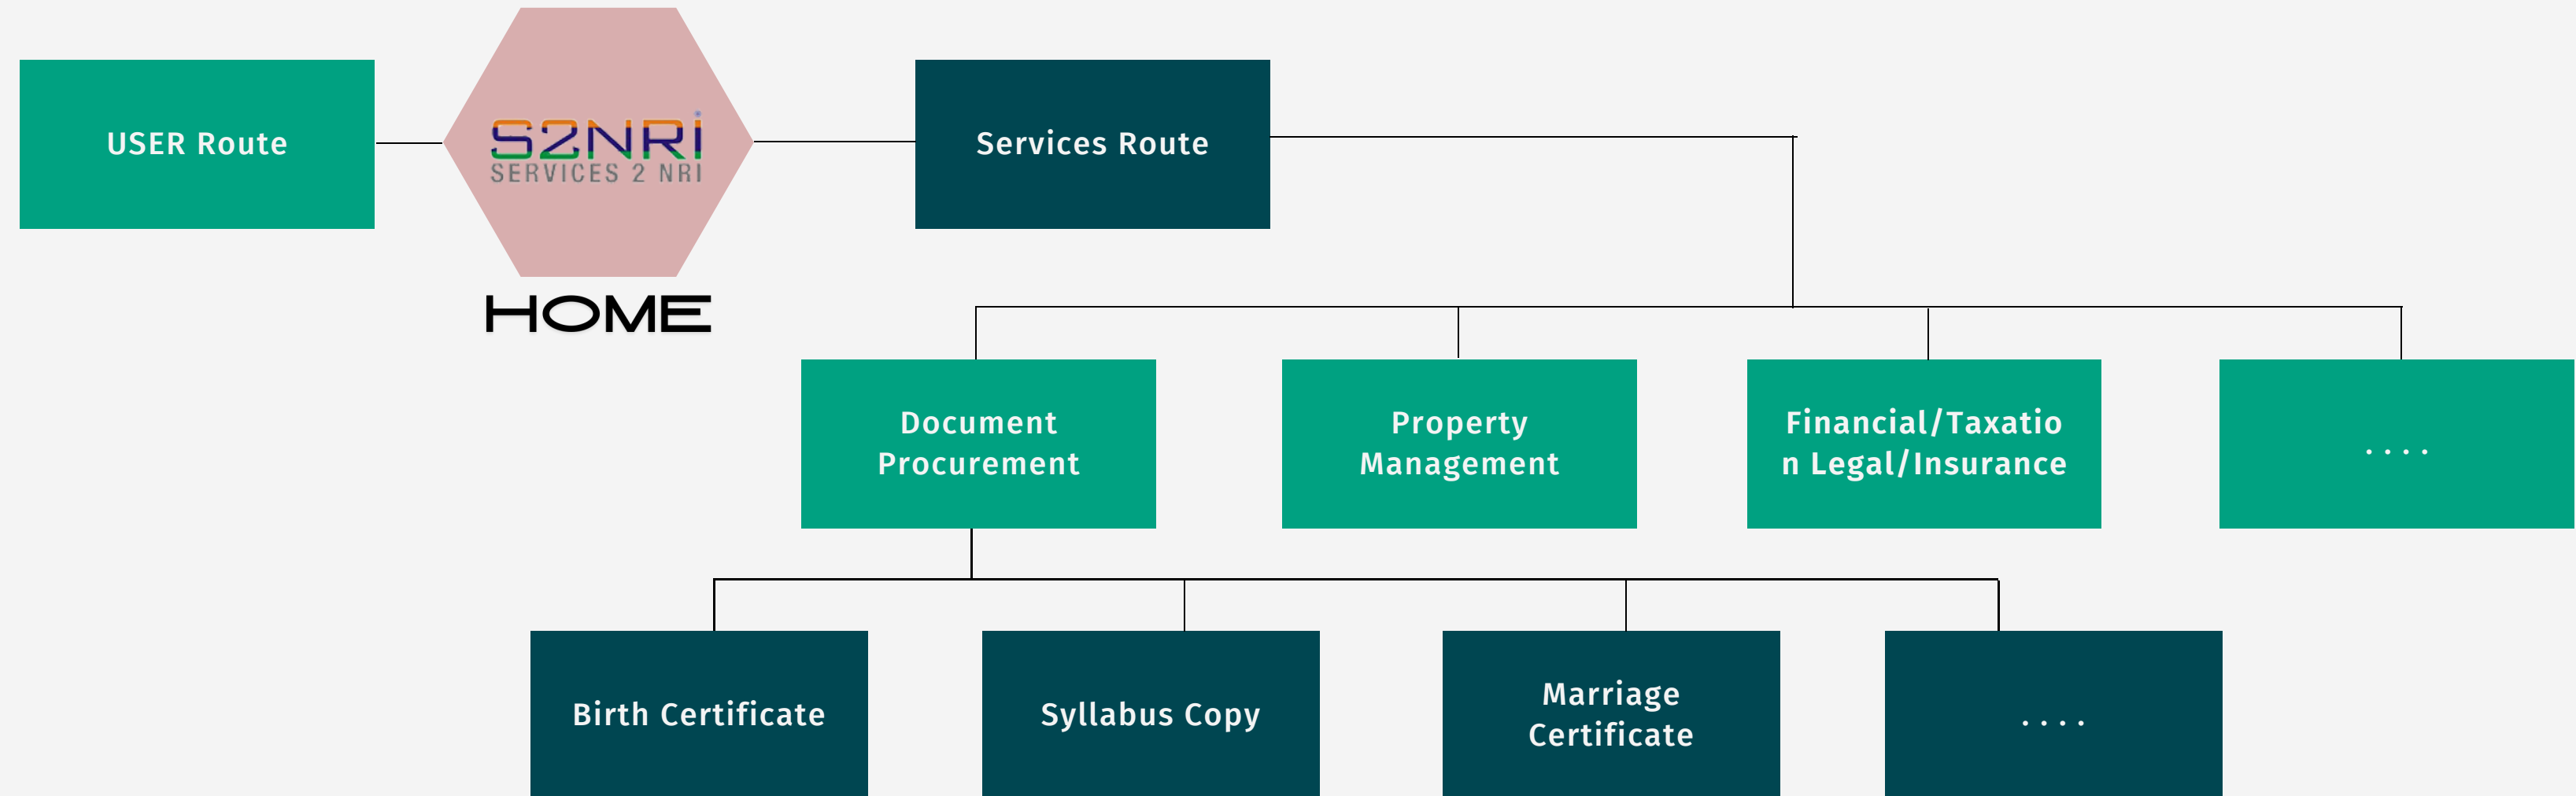

Collaboration

Collaboration is a major role wherein the team brainstorms the various ideas and completes the tasks by dividing them into modules

System development for Company

To improve the uncluttered data management and the events tracking methods previously followed this system is being developed.

Project Work - Chart

Methodology Used

**4064
Happy Clients**

**28
TESTIMONIALS**

- The Agile methodology is a way to manage a project by breaking it up into several phases.
- It involves constant collaboration with stakeholders and continuous improvement at every stage.

- Once the work begins, teams cycle through a process of planning, executing, and evaluating.
- Continuous collaboration is vital, both with team member and the Client.
